DETAILED ACTION

Drawings

1. New corrected drawings are required in this application because the drawings appear to be informal. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 6-10 and 14-22 are allowed.

3. The following is an examiner's statement of reasons for allowance:

Claims 6-10 and 14-17 are allowed for including the allowable subject matter in claim 13 in the independent claim 6 as indicated in the Office action made on Mar 23, 2004.

As to newly added claims 18-22, neither prior art of record nor references teach an integral rider control device for a handlebar steered vehicle comprising a one-piece support structure with both end handgrip receiving portions, multiple non-tubular receptacles formed in the support structure between both ends for receiving equipments, a central portion having upper and lower spars wherein both spars are disposed vertically relative to each other, and a connecting member that connects to the steering axis of the vehicle molded into the lower spar to extend outwardly from the lower spar.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
